Facial Recognition Analysis
by Dragica Brayovic
Super Recogniser

FINAL REPORT

My instructions provided by Dr. Peter Chojnowski:
- To review 3 images that were labeled as:

Picture #1: Subject 1. Unknown date. From 1990 documentary.

#1Older Sister

Picture #2: Known Older Sisters of Sister Lucy dos Santos: Teresa, Maria dos Anjos, Carolina and Glória. Picture taken in the late 1960s.

#2 Known Sisters

Picture #3: Sister Lucy II. Woman identified as a substitute for the original Sister Lucy.
- I was provided with an additional four images of Sister Lucy II for further facial reference.
- I was also provided with a short clip from a documentary of Subject 1 and then the full version of the documentary of Subject 1 and Santa Lucy II.

#3 Sister Lucy II

- After familiarising myself with the images and video footage I was asked to answer the following questions:

    1) Is Subject 1, portrayed in the video as an "older sister" of Lucy, actually the Substitute Sister Lucy II?
    2) Is Subject 1, any of the sisters of Lucia dos Santos, as these are comprehensively portrayed in the picture below.

Based upon my extensive review I can determine the following:

• **Subject 1,** who is portrayed in the video as an "older sister" is <u>not</u> the **Substitute Sister Lucy II**.
• **Subject 1 is <u>not</u> a sister of Lucia dos Santos** as portrayed in the image provided.

Facial Recognition Analysis by Dragica Brayovic
dragica.brayovic@hotmail.com

Dragica Brayovic has an above average ability to recognise faces, being named Australia's #1 Super Recogniser in 2017. This has given Dragica the opportunity to look over a range of different cases, from workplace investigations, security/surveillance videos, partner infidelity, missing persons and much more. Dr David White of the University of New South Wales (UNSW) and his team continue to do research behind this unique skill.
